Summary

I am a results-driven and innovative Full Stack Web Developer with a passion for transforming ideas into digital realities. With a strong foundation in HTML/CSS, PHP, Python, and an eye for detail, I specialize in creating dynamic, user-friendly web applications that not only meet but exceed expectations.

My journey at the Virtual University of Pakistan, where I earned my Bachelor of Science in Computer Science, was a pivotal experience that ignited my love for technology and honed my problem-solving skills. My academic achievements, including a notable final year project, "PDF to Audio Converter," are a testament to my dedication to meaningful innovation.

What sets me apart is my commitment to collaboration and my ability to bridge the gap between ideas and execution. I thrive on understanding clients' needs, adapting to new technologies, and delivering high-quality, well-documented code within project deadlines.

As I continue to evolve in the ever-changing tech landscape, I look forward to contributing my skills in data analysis, databases, project management, and Python programming to create digital solutions that make a difference.

Let's connect and explore how we can innovate and achieve together.

Experience

Web Developer

Virtual University of Pakistan

Aug 2021 - Present (2 years 3 months)

As a passionate Junior Full Stack Web Developer, I specialize in creating tailored web solutions for students' final year projects. My expertise lies in leveraging HTML/CSS, PHP, and Python to develop interactive and dynamic web applications that meet the unique requirements of each project. I take pride in collaborating closely with students, understanding their vision, and translating it into functional websites that exceed their expectations. With a strong commitment to delivering high-quality, well-documented code and a track record of meeting project deadlines, I am dedicated to helping students achieve academic success through innovative web development.

Education

Virtual University of Pakistan

Bachelor of Science - BSCS, Computer Science

Aug 2018 - Jan 2023

My journey at the Virtual University of Pakistan has been nothing short of transformative, a crucible that forged me into a Full Stack Web Developer with a deep passion for technology and an unyielding commitment to excellence. My hard-earned CGPA of 3.27 serves as a testament to the countless hours I invested in mastering the intricacies of computer science. Furthermore, my final year project, the "PDF

to Audio Converter," symbolizes the pinnacle of my academic endeavors—an innovative solution that showcases my problem-solving skills and my dedication to using technology for meaningful change. As I continue to traverse my career path in web development, I carry with me the wealth of knowledge and experiences gained during my time at the Virtual University, confident that they will continue to shape my future contributions to the ever-evolving tech landscape.
